Golden Black Marble

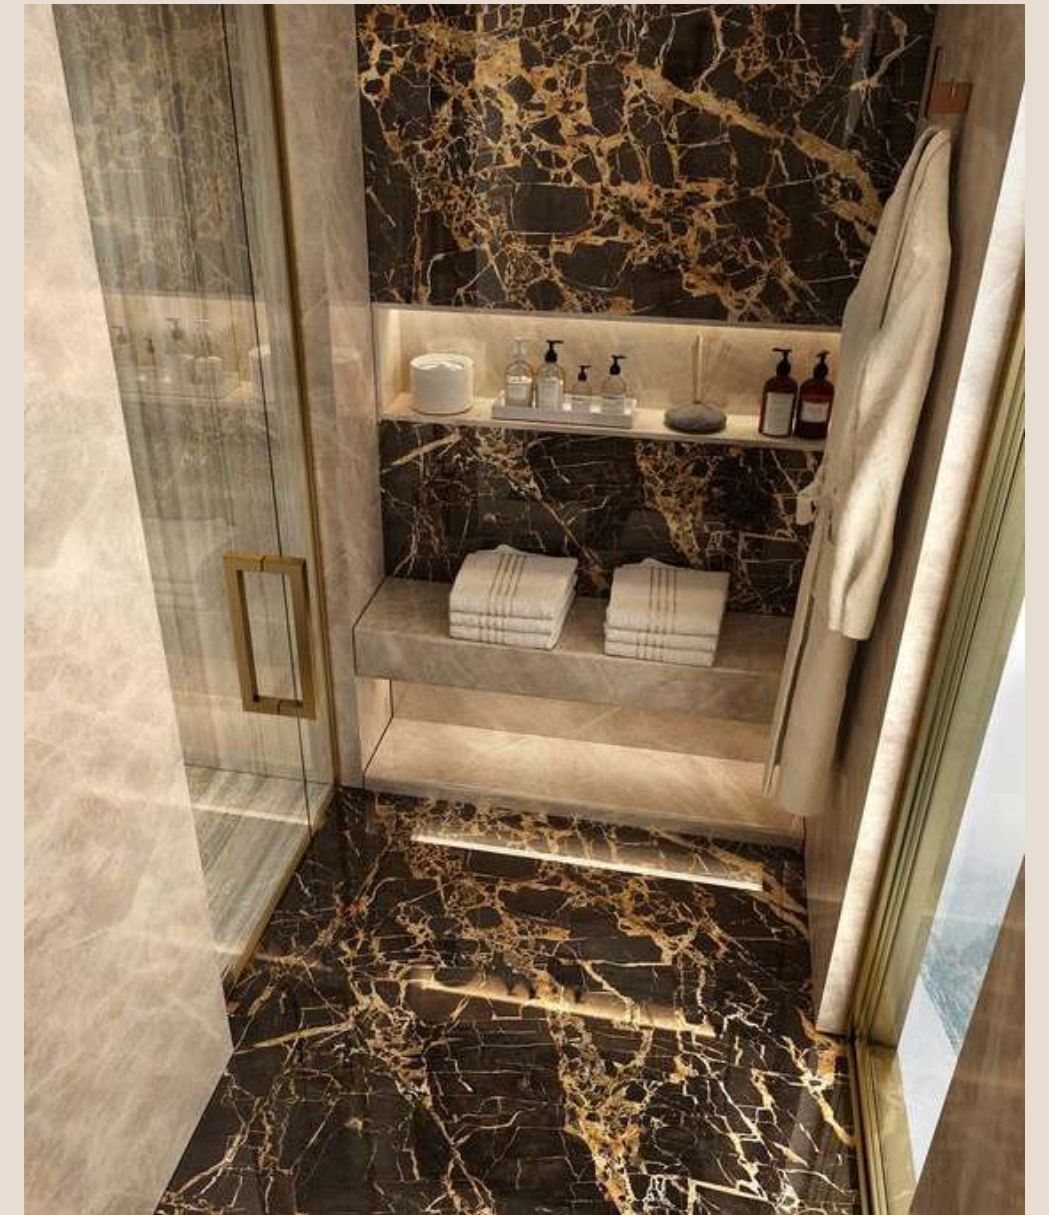

What's Golden Black Marble?

Golden Black Marble is a type of natural stone that is quarried in Iran. It is also known as Black and Gold Marble. This marble is characterized by its black background color and striking golden and white veins and comes in a range of dark brown to black backgrounds.

This Iranian marble is a luxurious and durable natural stone that is popular for high-end residential and commercial applications. Its characteristics and stunning appearance make it a unique and eye-catching choice for any design project.

Irregular white and gold streaks on the surface of this stone can provide stunning book-matched and for-matched slabs.

Golden Black Block

When it comes to Golden Black marble blocks, they would typically be large chunks of the marble extracted from the quarry before being processed further. The size and dimensions of the blocks can vary depending on the specific quarry and the intended use. These blocks can be later cut into slabs or tiles based on the desired thickness and dimensions.

Golden Black Slab

Golden Black marble slabs showcase the unique veining and color variations of the stone. The size of the slabs can vary, but they are generally available in standard dimensions.

Golden Black Marble slabs are commonly used for countertops, flooring, wall cladding, and other decorative applications in both residential and commercial projects.

The natural beauty and durability of Golden Black marble make it a popular choice for adding elegance and sophistication to interior spaces.

1

Being resistant to heat and moisture, which makes it an ideal choice for kitchen and bathroom applications

2

It is a popular choice for flooring due to its durability, unique appearance, and easy maintenance.

3

It can be used as decorative accents in various architectural and design elements, such as columns, moldings, and fireplaces.
